### DETAILED ACTION

1. This office action is in response to the preliminary amendment filed November 21, 2000.

#### *Drawings*

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "92" has been used to designate both a Cr/Au layer and a polymer in Fig. 5H and 5I. Corrections are required.

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 43-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grivna et. al. (U.S. 5,641,712).
5. Grivna discloses a semiconductor device, a patterned conductive layer (11,24,26) on a substrate (10) with an air gap (47) surrounded by said conductive material, and an overcoat of a dielectric layer (14) overlying said patterned layer wherein said gap has a height that exceeds the adjacent conductive material.
6. In regards to claims 43-55, the process of forming an air gap is a product by process characteristic that is given no patentable weight in determining patentability of the final device structure.

7. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based upon the product itself. The patentability of a product does not depend on its method of production. If the product in product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product is made by a different process." *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985).

8. A "product by process" claim is directed to the product per se, no matter how actually made, *In re Hirao and Sato et al.*, 190 USPQ 15 at 17 (CCPA 1976) (footnote 3). See also *In re Brown and Saffer*, 173 USPQ 685 (CCPA 1972); *In re Luck and Gainer*, 177 USPQ 523 (CCPA 1973); *In re Fessmann*, 180 USPQ 324 (CCPA 1974); and *In re Marosi et al.*, 218 USPQ 289 (CAFC 1983) final product per se which must be determined in a "product by, all of" claim, and not the patentability of the process, and that an old or obvious product, whether claimed in "product by process" claims or not. Note that Applicant has the burden of proof in such cases, as the above caselaw makes clear.
